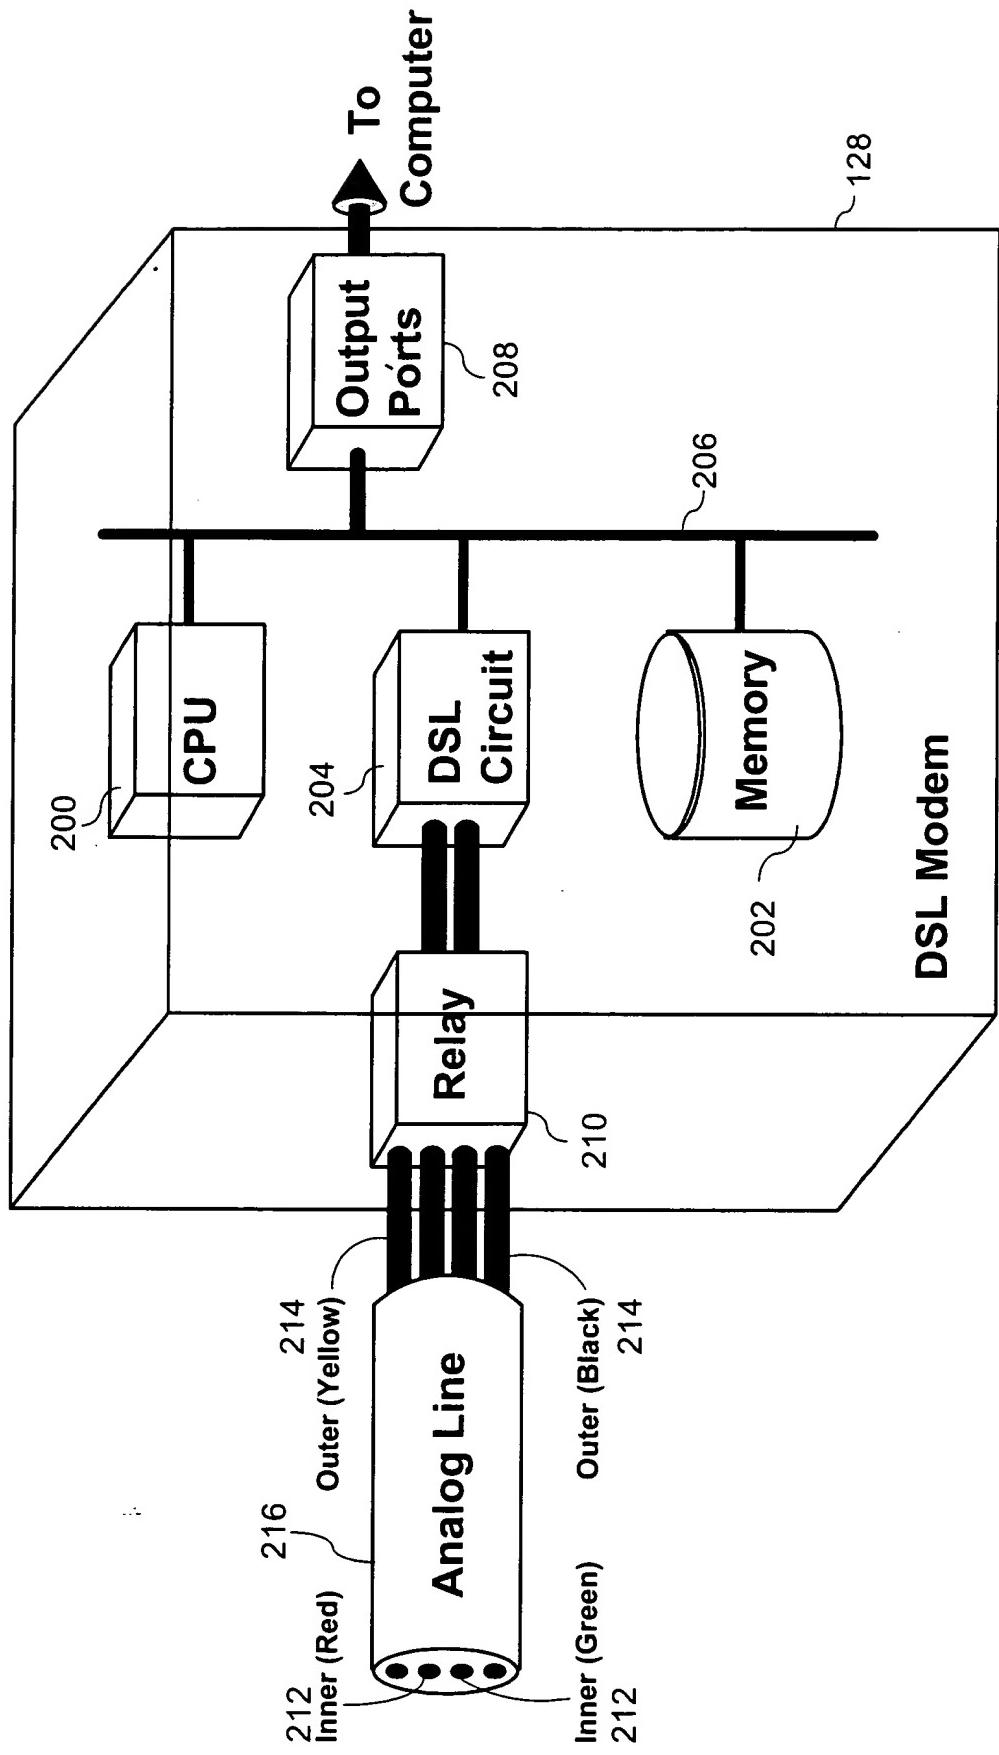

FIG. 2

<b>MEMORY</b>	202
<b>Operating System</b>	304
<b>Instructions for Connecting to Analog Line</b>	306
<b>Instructions for Determining Communication Resources</b>	308
<b>Instructions for Detecting if Circuit Exists</b>	310
<b>    Instructions for Establishing First Connection</b>	312
<b>    Instructions for Ascertaining Circuit Existence</b>	314
<b>    Instructions for Generating Second Connection</b>	316
<b>    Instructions for Testing Circuit Existence</b>	318
<b>    Instructions for Storing Results</b>	320
<b>    Instructions for Identifying Virtual Communication Route</b>	322
<b>        Instructions for Transmitting Test Signals</b>	326
<b>        Instructions for Sending Test Cells</b>	328
<b>        Instructions for Receiving Response Signal</b>	330
<b>        Instructions for Matching Response to Static List</b>	332
<b>        Instructions for Acquiring Response Cell</b>	334
<b>        Instructions for Storing Response Signal</b>	336
<b>Instructions for Configuring the DSL Modem</b>	338
<b>Available Communications Resources</b>	340
<b>List of VPI/VCI DSLAM pairs</b>	342
